Professional Profile

Motivated software development learner with hands-on practice in building responsive websites and mobile applications. Currently improving skills in HTML, CSS, JavaScript, Flutter, Firebase, and Node.js through practical projects, clean UI design, and problem-solving activities.

Technical Skills

Frontend	HTML, CSS, JavaScript, responsive design, animations, UI layout
Mobile	Flutter, Dart, Firebase Authentication, Firestore basics
Backend	Node.js fundamentals, callbacks, promises, async/await concepts
Tools	VS Code, Git/GitHub basics, Firebase Console, browser developer tools

Projects

LifeOS Mobile App

- Personal productivity and life management mobile app with tasks, finance, goals, notes, profile, analytics, Firebase integration, and modern UI design.

SkillHub Portfolio Website

- Professional portfolio website built with HTML, CSS, and JavaScript, including dark mode, responsive design, gallery, contact form, progress bars, animations, and CV download.

Coffee Shop Website

- Responsive business website concept with hero banner, about section, contact form, gallery, footer, links, animation, and JavaScript interactions.

Finance Tracker Concept

- Simple finance management system concept for income, expenses, balance tracking, and clean dashboard presentation.

Learning & Certifications

- Python for Beginners - completed beginner-level Python programming certification.
- Node.js fundamentals - practiced callbacks, promises, and async/await concepts.
- Web development practice - built responsive web pages using HTML, CSS, and JavaScript.

Strengths

- Quick learner with strong interest in practical project development.
- Able to follow step-by-step workflows and improve projects through testing and debugging.
- Interested in creating clean, user-friendly, and professional digital products.

Career Goal

To continue developing real-world web and mobile applications, strengthen full-stack development skills, and build a professional portfolio for internships, freelance work, and entry-level software development opportunities.

Note: Replace placeholder LinkedIn/GitHub links with your real profile URLs before final submission.
